Professional Summary

Results-driven **Full Stack Developer** with hands-on experience building **scalable web applications**, **AI-powered backends** and **cloud-deployed microservices**. Recently completed a **B.Tech in Information Technology (2026)**. Proven ability to deliver **production-grade features** as a **Frontend Developer Intern at Haskel AI**, where I developed **12+ reusable React components** and integrated **20+ REST APIs** for an **LMS platform**. Proficient in the **MERN stack**, **Spring Boot**, **LangChain** and **AWS** with a strong track record of solving **600+ DSA problems** on **LeetCode** and earning the **Best Project Award 2026**. Passionate about leveraging **AI** and **cloud technologies** to build **impactful, user-centric software**.

Education

Karpagam College of Engineering <i>B.Tech in Information Technology — Anna University</i> CGPA: 7.6 / 10.0	Coimbatore, Tamil Nadu <i>Aug 2022 – May 2026</i>
S D Eaden Matric Higher Secondary School <i>Higher Secondary Certificate (HSC) — State Board</i> Score: 85%	Vadalur, Tamil Nadu <i>2022</i>
S D Eaden Matric Higher Secondary School <i>Secondary School Leaving Certificate (SSLC) — State Board</i> Score: 91%	Vadalur, Tamil Nadu <i>2020</i>

Technical Skills

Programming Languages: Java, JavaScript (ES6+), Python, C
Frontend: React.js, HTML5, CSS3, TailwindCSS, Bootstrap CSS
Backend: Spring Boot, Node.js, Express.js, FastAPI
Databases: MySQL, MongoDB, DynamoDB
Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, CloudWatch, IAM), Docker
Other Tools: Git, Linux, Postman, Insomnia, LangChain

Work Experience

Frontend Developer Intern <i>Haskel AI</i>	Remote <i>Feb 2025 – Feb 2026</i>
- Developed 12+ reusable React components for LMS modules using modern state management patterns, improving UI scalability and reducing redundant code across the entire frontend codebase. - Integrated 20+ RESTful API endpoints and handled asynchronous data flows using modern JavaScript (ES6+), enabling efficient client-server communication and dynamic content rendering. - Optimized frontend performance by minimizing unnecessary re-renders and streamlining state updates, resulting in measurably improved application responsiveness for LMS end-users. - Collaborated with backend teams to define API contracts and ensure seamless data flow between services, improving overall feature delivery speed and cross-team alignment.	

Key Projects

ShopMind AI LangChain-Powered Intelligent Inventory Assistant AI Engineer	Jan 2026
- Architected an AI-driven inventory management backend using FastAPI, MongoDB and LangChain, capable of handling 75+ product records and processing natural language inventory queries with high accuracy. - Integrated Groq LLM for natural language understanding and response generation, designing a secure AI service layer that isolates database access from the LLM pipeline to prevent hallucinations or data corruption. - Implemented 8+ RESTful API endpoints and a React-based interface to enable real-time inventory queries and interactive product management workflows. <i>Tech Stack: FastAPI, MongoDB, LangChain, Groq LLM, Pydantic, React.js</i>	

Resume-Doc <i>RAG-Powered AI Resume QA Bot</i> AI Engineer	Jan 2026
- Constructed an end-to-end RAG (Retrieval-Augmented Generation) pipeline to intelligently parse and analyze resume documents, enabling context-aware question answering with high factual accuracy. - Delivered a ChatGPT-style conversational QA interface allowing users to query resume content in natural language, powered by LangChain and Groq LLM for fast and accurate response generation. - Leveraged vector embeddings and semantic search to retrieve the most relevant resume sections prior to LLM inference, reducing hallucinations and improving answer relevance. <i>Tech Stack: FastAPI, LangChain, Groq LLM, RAG, Vector Embeddings, React.js</i>	
Cityzen <i>Citizen Management System</i> Full Stack Developer	Jul – Aug 2025
- Architected a microservices-based citizen service platform using Spring Boot and React.js, supporting multiple user roles with JWT authentication and role-based access control (RBAC). - Developed 30+ RESTful APIs integrated with MongoDB and MySQL to support document processing, service booking, and volunteer coordination workflows. - Containerized backend services with Docker and automated CI/CD pipelines using Jenkins, improving deployment portability and enabling scalable inter-service communication. <i>Tech Stack: React.js, Spring Boot, MongoDB, MySQL, Docker, Jenkins, Vercel, Render</i>	
Thinker <i>Serverless Notes Management Application</i> Cloud Backend Developer	Sep 2025
- Engineered a fully serverless notes management backend using AWS Lambda, API Gateway, and DynamoDB, delivering a scalable, high-availability REST API with zero server maintenance overhead. - Implemented complete CRUD operations with IAM role-based access control and integrated CloudWatch logging for real-time monitoring, improving system reliability and operational visibility. <i>Tech Stack: AWS Lambda, API Gateway, DynamoDB, CloudWatch, IAM, Node.js</i>	
Develop Your Skills <i>E-Learning Platform</i> Freelance Full Stack Developer	Oct 2024
- Launched a microservices-driven MERN e-learning platform aggregating top open-source YouTube tutorials, delivering a seamless and personalized learning experience at scale. - Engineered independently scalable REST microservices using Express.js, optimizing MongoDB for high-performance data processing and real-time course delivery. - Created a role-based React UI that dynamically adapts features for admins, instructors and learners, ensuring a secure and personalized experience across all user types. <i>Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap, Docker</i>	

Certifications

• Wipro Java Full Stack Certification — Wipro TalentNext	Nov 2025
• AWS Cloud Practitioner Essentials — Amazon Web Services	Nov 2025
• Developing Back-End Apps with Node.js and Express — IBM, Coursera	Jun 2025
• Advanced React — Meta, Coursera	Jan 2025
• React — Meta, Coursera	Aug 2024
• Introduction to MongoDB — MongoDB University	Aug 2024

Achievements & Awards

Best Project Award 2026 — Final Year <i>Department of Information Technology</i>	Karpagam College of Engineering 2026
Awarded Best Project of the Year 2026 by the Department of Information Technology, recognized for innovation, technical depth and real-world applicability among all final year graduates.	
LeetCode Problem Solving <i>Data Structures & Algorithms</i>	leetcode.com/Siranjeevi619 Ongoing
Solved 600+ Data Structures and Algorithms problems on LeetCode, demonstrating strong problem-solving skills.
